

FOR IMMEDIATE RELEASE

**EXTREME ADHESIVES™ POOL AND SPA ADHESIVE EFFECTIVE AND EFFORTLESS TO USE**

**(SEABROOK, NH, April 24, 2008)** – *Pool and Spa Adhesive* from Extreme Adhesives, Inc.™, the manufacturer and distributor of high performance product assembly adhesives worldwide, is gaining a broad fan base for its ease of application, flexibility and convenience.

The *Pool and Spa Adhesive* is a two-part, high-strength, fast drying white adhesive for plastic and metal bonding. Its average setting time is only ten minutes and, unlike most adhesives, it cures under water. Its applications include the repair of filters, leaking PVC pipes, light housings, and more, without having to drain water or remove an object from the water. Application and mixing require a manual dispense gun and static mixer.

“Our Pool and Spa Adhesive users, including True Blue Pools in Fla., are commonly surprised at how simple and fast the application process is,” says Extreme Adhesives President Jim Yeames. “When you think about how daunting a task it can be to drain a pool of water or remove a boat from the water for repair, an adhesive that cures so quickly under water is a big time and money saver.” For more information, please email [news@extremeadhesives.com](mailto:news@extremeadhesives.com).

Since 1987, Extreme Adhesives, Inc. (formerly Adhesives Engineering & Supply Inc.) has been a leading manufacturer and distributor of high quality product assembly adhesives for a wide range of industries worldwide. Extreme Adhesives’ expert technical staff advises customers in the selection of the proper structural or non-structural adhesive for their application and production needs, including bonding of plastics, composites, metals and finishes, to ensure efficiency and long lasting results. Extreme Adhesives also offers specific adhesive products for Marine, Sign and other Specialty Markets. For more information, please call 800-888-GLUE or visit [extremeadhesives.com](http://extremeadhesives.com).
