

## **NEW FROM ABATRON: TREAD SPREAD™ SLIP RESISTANT EPOXY COATING.**

July 06, 2018 — ABATRON, INC. is excited to introduce TREAD SPREAD™, an easy-to-apply epoxy coating that exceeds OSHA and ADA recommendations for slip-resistance in both wet and dry conditions. TREAD SPREAD offers users a durable, cost-effective solution for adding traction to areas where proper footing is critical to safety. In contrast to tape-based traction support products, TREAD SPREAD will not lose adhesion to wet or completely submerged areas. TREAD SPREAD bonds to a variety of surfaces including concrete, wood, metal and fiberglass, making it an ideal choice for a variety of applications, including: commercial, industrial, institutional, recreational and residential purposes.

TREAD SPREAD offers the following benefits:

- Reduce the likelihood for slips and falls
- Easy to mix and easy to apply
- Extremely durable – lasts much longer than tapes
- Use on wet, dry, and underwater surfaces

TREAD SPREAD is available for purchase in 2 pint, 2 quart and 2 gallon kits. Each gallon allows for 12 square feet of coverage at 1/8-inch thickness. Customers can choose from two colors, safety yellow or slate gray, depending on the requirements of their project.

Visit the Abatron, Inc. YouTube channel to watch a video demonstrating how easy TREAD SPREAD is to apply.

Founded in 1959, Abatron, Inc. is a manufacturer of epoxy coatings and adhesive products. Abatron's primary focus is to provide products that are:

- At the top of their category in performance
- Permanent
- Safe to use and safe for the environment
- Easy to use
