

**FOR IMMEDIATE RELEASE****Automatic Pool Covers Expands Manufacturing plant**

Westfield, Indiana—Automatic Pool Covers Inc., a manufacturer of a complete line of automatic pool covers for new and existing swimming pools and spas, is pleased to announce it has doubled the size of its manufacturing facility. “We have experienced exponential growth in the last couple years and therefore needed to expand our manufacturing and warehousing footprint” says Michael Shebek, CEO of the company.

Located in Westfield, Indiana, just north of Indianapolis, APC has been making automatic pool covers to enhance the swimming pool experience while simultaneously providing a safer swimming environment for consumers.

Automatic Pool Covers, Inc.'s expansion is their 2nd - 40,000 sq. ft. expansion in the past 5 years*

“We’ve made the commitment to cutting-edge technology and manufacturing processes with a clear focus on excellent customer service – which is why our products are among the most trusted and innovative in the pool cover industry,” says Shebek. The company’s commitment to innovation and fast turnaround times to the industry directly drove the need to expand the company’s facility.

Automatic Pool Covers, Inc. opened its doors in 1979 as a small pool cover distributor. Michael Shebek worked side-by-side with his father, Mike Shebek Sr. putting in more than 20,000 hours

of time installing and servicing covers himself when he took over as sole owner of the company in the year 2000. In 2003 the company began manufacturing its first automatic pool covers. “We decided to manufacture covers because there was a need in the market to create an automatic cover that was designed by installers for installers. The accomplishment of that initiative has led to our success and thus to this major expansion” says Shebek.

APC is committed to continuous improvement both of its products and processes and has all its associates participate in annual Lean Manufacturing training. “We are very committed to ensuring the ongoing prosperity of our pool builders and all those that participate in making safe backyard living spaces for consumers,” notes Shebek. To learn more, call or visit their website.

To celebrate the expansion, APC invited customers to a grand-opening event that took place at the newly expanded facility. The event included a tour, banquet dinner and awards ceremony.
